Example Fact Sheet

Section II-(C)

Source of Official Soil Survey Data

Larimer County – General

The traditional final product of first generation soil survey mapping has been the soil survey publication. Each publication included soil map unit descriptions, series descriptions, tables of properties and interpretations for various uses, and soil maps. One copy of this publication is retained at the USDA Service Center, NRCS field office, and designated as the “Official Copy”. This official copy was established to maintain the most current soil information for a soil survey area.

Official Soil Map: The Larimer County Area, soil survey was published in 1995 and remains the official source of soil maps. The soil maps have been digitized and are available for download from this web site (<http://soil.usda.gov/SoilDataMart/>). **Spatial Version 1 – May 25, 2002.**

Official Soil Data and Information: The official source of soil data and information is available from this web site (<http://www.nrcs.usda.gov/technical/efotg/>) as static PDF documents and dynamic access to the data in a soil database. **Tabular Version 2 – October 12, 2002.**

The soil data and information can be downloaded and imported into a Microsoft Access database template. The template is available when downloading the soil data.

Copies of the published soil survey area available from:

Larimer County Field Service Center
2150 Centre Ave, Bldg A
Fort Collins, CO 80526

TELEPHONE: (970) 295-5650

For additional assistance and information in using the soil survey information, contact the NRCS field office or the NRCS State Soil Scientist at: (720) 544-2840.
